MORE New Stuff!

MFJ is introducing more new stuff.

In total we have 18 new products gracing the website at this time. Here are a few more looks at some of the new shiny gear from MFJ. The new stuff includes this handy mounting pad. The [MFJ-330](#) gives you a much stronger HF signal when you use a magnet mount for HF and a direct ground wire connection to your vehicle chassis is not available. Lets you talk farther and longer on 40-6 Meters mobile. Use two or more [MFJ-330](#) for 80/60 Meter operation. MFJ's magnetic ground pad provides an effective ground *required* for HF mobile antennas when a direct ground wire is not available.

Past Issues RF Isolator

Translate ▼

MFJ-9212-SO

This Portable RF isolator with BNC connectors is a High isolation 1:1 balun using type 43 ferrite material, binocular core and multiple turns of RG-174. Effectively isolates antenna and feedline, removes troublesome RF on coax shield that cause Microphone bites/RF burns, reduces RFI and noise. Correct radiation pattern for better signal reports. Convert balanced dipole, doublet, ladder line to unbalance coax feed. 1.8-60MHz, handles 125 Watts,

MFJ-9241-BN

Portable ,easy-to-carry 3-position antenna switch selects 1 of 3 antennas. Especially helpful during fast pace POTA or contest-- lets you quickly select best antenna for DX (like a vertical) or for close-in contact (like a low dipole) or for best reception (like a receiving loop). Improve scores/contact rate. Great for testing different antennas. Switch in a dummy load to make testing, setup faster and easier. Low SWR 1.8-60MHz ,good to 2 Meters. 200 Watts. BNC connectors.
